

Tommaso Ballarin

ballarintom@gmail.com | [LinkedIn](#)

Education

Computer Engineering - University of Padua

Master degree in Computer Engineering (AI and Robotics)

Expected December 2026

Biomedical Engineering - University of Padua

Bachelor degree in Biomedical Engineering

September 2024

Experience

Intern, Euclid Labs

January 2026 - April 2026

- C# and KRL (Kuka Robot Language) programming
- Practical experience on KUKA and SCARA robot: path planning, bin picking, singularity analysis

Projects

Face Detection and Emotion Recognition

[tommyballa/FaceAndEmotionRecognition.git](#)

The application processes static input images and detects the face of every person present in the image and classifies the corresponding facial expression. Face detection is performed using the Viola-Jones algorithm, while emotion recognition is based on a custom CNN model.

- Skills: C++, OpenCV, Python, PyTorch

Deep Visual Attention via Swin-Transformer

[tommyballa/Visual-Saliency-Prediction.git](#)

- Development of a Swin-Transformer-based Deep Learning architecture for Saliency Prediction, optimized for complex spatial feature extraction using Computer Vision techniques
- Skills: Pytorch, Python, Google Colab

Skills

Programming languages: Python (PyTorch, numpy), C++ (OpenCV, ROS2), SQL, Matlab

Languages: Italian, English C1

Extracurricular Work Experience

Warehouse Worker, Trapuntificio Casini

June 2022 - September 2022

June 2021 - September 2021

Personal Information

Indirizzo di residenza: via Londra 11, Vigonza (PD)

Mail: ballarintom@gmail.com
